### Risks

Investment in the fund involves a high degree of risk. The level of returns and the availability and timing of relief for investors may be impacted by:

- Returns generated by the Investee Companies
- An investor's tax position and changes to legislation
- The availability of investment opportunities for the Manager and the S/EIS qualifying status of investments
- Tax rules, levels and regulations are subject to change and the availability of tax reliefs will depend upon individual circumstances.

Past performance is not a guide to future performance and may not be repeated. The value of an investment in the Fund can go down as well as up and you may not get back the full amount invested. You should consider an investment in the Fund as a medium term investment. Investments made by the Manager are likely to be illiquid. Investors are advised to seek relevant legal, financial and tax advice before making any decision to invest. Full details of the risk factors and associated mitigation techniques can be found in the 'Risk Factors' section on page 30 of the Information Memorandum.

"I have now recommended the products of CHF for nearly 4yrs. I find them to be an innovative, proactive company and their service and post investment back up is of a very high standard. I would have no hesitation in recommending CHF to advisers and clients alike...I've been able to invite clients to events which explain how their investment is used and gives them reassurance (including meeting David Jason!) and to the CHF Studio to see how the productions take shape which they found very interesting and cemented their decision to invest."
