

Kuber EIS Targeted Allotment Strategy

A diversified Strategy of EIS Managers who can offer a degree of control over allotment dates to allow for more predictable planning and tax relief.

RISK WARNING

The communication has been designed for financial advisers and other FCA regulated firms who are considering investment options for their clients. Other persons who receive this communication by accident should disregard the content.

The Kuber Strategies are intended as a useful filter tool for adviser and are based on objective facts about the managers in question. They do not replace your need to undertake your own due diligence. The underlying investments accessed through Kuber are often illiquid and therefore high risk and will not be suitable for all investors. Please ensure you have considered the risks set out in the documentation for an investment before making a recommendation. Tax reliefs are personal to investors' circumstances and tax regimes may change.

This financial promotion has been approved for the purposes of section 21 of the FSMA by Oxygen Ventures Ltd which is authorised and regulated by the Financial Conduct Authority (FCA) under number 208188. Kuber Ventures Limited is an Appointed Representative of Oxygen Ventures Limited under number 574987.

IMPORTANT:

Please note that Kuber carries out Due Diligence on the Managers/Providers but does not carry out due diligence on the underlying investee companies; the unquoted nature of these investments mean Kuber are forced to rely predominantly on the information provided on investee companies by the Manager/Provider and Companies House.

EIS Targeted Allotment Strategy

A diversified Strategy of EIS Managers who can offer a degree of control over allotment dates to allow for more predictable planning and tax relief.

The unquoted tax efficient space is a complex space and the allotment of shares in the underlying investee companies determines the year in which reliefs can be claimed. This Strategy looks to: combine multiple Managers who aim to fully allot this tax year; get investors tax relief on their full subscription; offer a minimum 1% fee rebate or reduction; provide Kuber's enhanced ongoing monitoring and reporting; and deliver this application and reporting digitally. *

Please note that tax treatment varies according to individual circumstances.

Offering:

- Diversified portfolio of Managers who have passed Kuber's rigorous due diligence.
- Only Managers who can fully allot in the current tax year or sooner.
- Only Managers who offer tax relief on the full subscription amount.
- As a Kuber strategy this portfolio will also come with quarterly ongoing monitoring and reporting as well as administrative efficiencies.
- Kuber charges fees to Investors as detailed in the Platform Guide, the Managers also charge fees as referenced in the DD pack.
- Fully digital offering.
- All Managers offer a rebate or a reduction of their fees.

Compelling Investment Case:

First and foremost the Managers' investment experience and processes must stack up. Kuber carries out due diligence on the Manager but is reliant on that Manager for information on the investee companies. All of the Managers in this strategy have compelling investment cases.

Prompt allotment and Carry Back to 2019/20:

Getting funds deployed into underlying investee companies not only puts that money to work but also determines: the timing of which tax year the investor can offset income tax in; the calendar year for CGT deferral; and when the Business Relief clock starts ticking.

All of the Managers in this strategy are committing to allotments this tax year or sooner. Allotments in the current tax year should allow income tax relief to be carried back to 2019/20; which will likely be even more important this year after how many applications were postponed due to the original lock-down.

Tax Relief on the Full Subscription:

All of the Products in this strategy charge their fees at an investee company leveling, meaning that fees are taken after the tax relief has been calculated.

Cost Effective:

All of the Managers in this strategy have agreed to either a 1% rebate or a fee reduction which significantly reduces the cost of the strategy, ensuring additional investment for investors.

Diversification:

The Strategy offers an investment opportunity which diversifies the risk for investors in this high risk space, through investment across multiple Managers, each offering a diversified portfolio of underlying companies, spread over a range of sectors.

The levels of diversification mean the impact of each company and Manager as a proportion of the total portfolio may be lessened, with intention of smoothing returns.

Due Diligence:

Managers in the Strategy have all undergone initial and ongoing due diligence conducted by Kuber's Investment Committee, with support from Dr Brian Moretta, Hardman & Co. This research can be shared with Advisers and provides an additional layer of robustness to Advisers' recommendations.

Ongoing monitoring and reporting:

Ongoing due diligence is conducted by the Kuber Investment Committee, offering a tax efficient industry expert opinion in addition to transactional data for Client reviews. This helps meet regulatory requirements around ongoing suitability.

Single application digital offering:

Kuber provides advisers with a digital solution to access the investments in one place as well as administer, report on and maintain them in that same place. The administration burden for what would normally be a high maintenance portfolio is taken on by Kuber.

* RISK WARNING

SideBySide EIS Venture Fund – Investee companies (for illustrative purposes only) *

* This is an example of the pipeline portfolio companies an investor could expect. This list is subject to change at any time, and subject to market conditions and developments at the time of deployment and is not intended to represent any guarantee of allotment into any of these entities.

Investors (portfolio company)

Investors offer an FCA approved full-service software solution to help organisations manage investors and their companies. The software is currently being licensed in two key markets: (a) investors networks and groups wanting a regulated platform to manage their own investors and to share opportunities and (b) fundraising companies wanting their own individual platform to manage and channel investors, rather than sending them to a larger crowd funding platform.

Shot Scope (portfolio company)

Shot Scope uses a combination of patented wearable technology, patented processes, cloud-based algorithms and proprietary database IP to automatically collect a unique set of advanced statistical data that allows users to monitor and improve their performance, currently within the golf market.

Laundryheap (portfolio company)

LaundryHeap provides an on-demand laundry & dry-cleaning service, offering collection and delivery in just 24 hours. LaundryHeap's customers for the laundry service include both individual (B2C) customers using the service for personal laundry and dry-cleaning, and B2B businesses using the service for either their guest's laundry (hotels) or for laundry services for uniform, towels or tablecloths, and linen rental service (bedding, towels and toiletry packages) to the short-let and Airbnb market.

IoT/SaaS (pipeline company)

This company has developed a proprietary technology solution that combines IoT solutions with powerful, predictive data analytics and data integration capabilities. This technology digitises commercial real estate to provide energy and operational savings. This data is then overlaid with business intelligence, displayed via a centralised platform, for powerful analytics and real-time alerting.

AI/SaaS (pipeline company)

This company provides next-generation market intelligence that uses AI to grow market share of the world's largest companies. The technology and commercial engine is built, optimised and now a predictable machine. Brands use the companies platform to identify and understand niche audience networks (or communities) that represent high-opportunities for growth, with the ability to segment and track communities in real time, with information around their passions and content consumption habits. The data is then used in all major marketing, product media and publishing decisions.

DDQ (Strategy Name) / Launch Date	Kuber EIS Targeted Allotment Strategy / 26 Nov 2020
Scheme Name / Launch Date	Start-Up Series EIS Fund / 31 May 2018

Station12 Sports, Entertainment and Knowledge Service – Investee companies (for illustrative purposes only) *

* This is an example of the pipeline portfolio companies an investor could expect. This list is subject to change at any time, and subject to market conditions and developments at the time of deployment and is not intended to represent any guarantee of allotment into any of these entities.

Parade Media Limited

TV production and distribution.

Parade is a leading media and entertainment company that specialises in the development, production, co-production, financing and marketing of premium lifestyle and factual entertainment to a global audience.

Driven by a passion for great TV & Film, and led by its talent, producers, writers and editors, and their ability to tell stories in bold, new ways. Parade's catalogue of hit series and originals includes more than 1,200 hours of premium Lifestyle and Factual programming and can be seen on screens in more than 150 markets internationally.

Parade's sales, operations and marketing team are located in offices based in London, Miami and Singapore.

WhyBuy Limited

Rental of infrequently used household items by consumers for short period.

UK households spend £12bn per annum on household items which are often infrequently used, stored incorrectly and not maintained.

WhyBuy is developing an app that will allow users to order infrequently used household items to be rented by consumers for short periods to address issues of cost, quality, convenience and storage issues.

WhyBuy is building on the non ownership economy that has grown excessively in recent years through brands such as Uber and Airbnb.

WhyBuy opens up the possibility to users to access items that they want to use but loathe owning.

InSport Education (Sports12 Education Limited)

Sports business school, offline and online.

InSport Education originated out of Station 12's Venture Building activities and has identified an opportunity to build a business school offering professional education to emerging international executive talent and graduates who want to pursue a career in the business of sport.

InSport Education is partnering with leading premier league clubs to establish a business school in the UK, recruiting students worldwide with its initial focus on the football market. It aims to replicate this model into other sports.
