

# Kuber SEIS Follow-On Strategy

A Strategy for high risk markets with a degree of downside protection built in from SEIS relief to help account for high levels of market volatility.

## **Risk Warning**

The communication has been designed for financial advisers and other FCA regulated firms who are considering investment options for their clients. Other persons who receive this communication by accident should disregard the content.

The Kuber Strategies are intended as a useful filter tool for adviser and are based on objective facts about the managers in question. They do not replace your need to undertake your own due diligence. The underlying investments accessed through Kuber are often illiquid and therefore high risk and will not be suitable for all investors. Please ensure you have considered the risks set out in the documentation for an investment before making a recommendation. Tax reliefs are personal to investors' circumstances and tax regimes may change.

This financial promotion has been approved for the purposes of section 21 of the FSMA by Oxygen Ventures Ltd which is authorised and regulated by the Financial Conduct Authority (FCA) under number 208188. Kuber Ventures Limited is an Appointed Representative of Oxygen Ventures Limited under number 574987.

### **IMPORTANT:**

Please note that Kuber carries out Due Diligence on the Managers/Providers but does not carry out due diligence on the underlying investee companies; the unquoted nature of these investments mean Kuber are forced to rely predominantly on the information provided on investee companies by the Manager/Provider and Companies House.

## SEIS Follow-On Strategy

A Strategy for high risk markets with a degree of downside protection built in from SEIS reliefs to help account for high levels of market volatility

In times of uncertainty and market volatility there is high risk, but there is also high potential reward. This Strategy looks to capitalise on both through the generous tax reliefs afforded by SEIS. Initial income tax and loss relief offer a degree of downside protection, combined with CGT free upside potential. All the selected Managers apply EIS levels of due diligence to their SEIS investments with a view to follow on investment.\*

**Please note that tax treatment varies according to individual circumstances.**

- Diversified portfolio of Managers who have passed Kuber's rigorous due diligence.
- Only Managers who conduct EIS levels of due-diligence on their SEIS companies have been selected.
- As a Kuber Strategy this portfolio will also come with quarterly ongoing monitoring and reporting as well as administrative efficiencies.
- Kuber charges fees to Investors as detailed in the Platform Guide, the Managers also charge fees as referenced in the DD pack.
- Fully digital offering.
- All Managers offer a 2.1% fee rebate.

### Accounting for Volatile Markets:

2020/21 has been a tumultuous year. It has thrown many sectors into disarray, but in chaos there is opportunity. SEIS companies are high risk, but are also some of the most nimble and able to take advantage of market developments.

A Manager investing into SEIS companies is now armed with the knowledge of which sectors have suffered and which have prospered over the last year.

### SEIS tax relief with EIS levels of due diligence:

The Strategy specifically targets Managers who look to follow on their successful SEIS companies with EIS funding.

This approach justifies EIS levels of due diligence on SEIS companies. Were a Manager to only deploy the maximum £150,000 into an SEIS it would be difficult to justify so much due diligence.

By contrast EIS companies can receive up to £12m and warrant more time spent.

### Maximum qualifying amount:

To maximise the amount of tax relief that may be claimed, Kuber's initial fee of 1.5% and three years of Kuber's ongoing 0.2% fee will be rebated by the Managers.

### Diversification:

The Strategy offers an investment opportunity which diversifies the risk for investors in this high risk space, through investment across multiple Managers, each offering a diversified portfolio of underlying companies, spread over a range of sectors.

The levels of diversification mean the impact of each company and Manager as a proportion of the total portfolio may be lessened, with the intention of smoothing returns.

### Due Diligence:

Managers in the Strategy have all undergone initial and ongoing due diligence conducted by Kuber's Investment Committee, with support from Dr Brian Moretta, Hardman & Co. This research can be shared with Advisers and provides an additional layer of robustness to recommendations.

### Ongoing monitoring and reporting:

Ongoing due diligence is conducted by the Kuber Investment Committee, offering a tax efficient industry expert opinion in addition to transactional data for Client reviews. This helps meet regulatory requirements around ongoing suitability.

### Single application digital offering:

Kuber provides advisers with a digital solution to access the investments in one place as well as administer, report on and maintain them in that same place. The administration burden for what would normally be a high maintenance portfolio is taken on by Kuber.

#### \* RISK WARNING

*\* This is an example of the pipeline portfolio companies an investor could expect. This list is subject to change at any time, and subject to market conditions and developments at the time of deployment and is not intended to represent any guarantee of allotment into any of these entities.*

**Vidicrew** – collect user generated content and turn it into films! Currently focusing on and disrupting the wedding market - Together with their loved ones, couples use the free vidiCREW app to capture and collect video and photo moments of the whole wedding journey. Then vidiCREW's professional editors transform the videos into the most personal wedding film ever! Telling the whole story from every angle.

**LogistCompare** – a marketplace platform for warehouse space and associated services. Their aim is to provide ecommerce retailers with a one-stop-shop for their storage and fulfilment needs connecting organizations that need storage space with warehouse providers that can accommodate their requirements. The platform allows warehouse providers to rent out available space online and to promote their logistics services.

**Survey54** – a business SaaS platform for consumer surveys in continental Africa. Offering brand access to the African consumer market and intelligence through their unique solution of accessing survey respondents in Africa. Survey54 are building a large innovative software data company focused on emerging markets. Collecting and analysing data in innovative ways to enable companies and decision makers to make data-driven decisions through the use of machine learning and inspiring visuals.

**eTEU Technologies Ltd** – a technology platform that aims to improve efficiency of supply chain management for SMEs as well as to decrease administrative expenses in the maritime logistics industry. The platform, which utilises DLT, allows seamless transition to paperless trade and enables fast, safe, reliable and cost-efficient processing of shipping documentation. In addition, it will enable the players to automate the process of document drafting, which is a big step forward in terms of preventing unnecessary delays for the entire shipping supply chain.

**Nova Cofoundry SEIS Fund – Investee companies (for illustrative purposes only) \***

\* This is an example of the pipeline portfolio companies an investor could expect. This list is subject to change at any time, and subject to market conditions and developments at the time of deployment and is not intended to represent any guarantee of allotment into any of these entities.

**Bit Baby** – Educating pregnant women about the wellbeing of their unborn babies, reduce their anxiety and improve their confidence. Wearable device which measures baby's activity and sends the information to a smartphone/other device.

**CLIK** – A world where hearing loss does not mean isolation. A game-based hearing test suitable for children from 3.5 years of age.

**Doc** – Our vision is to see everyone in the world receive high quality healthcare in their own home amongst their loved ones and families. Digital solution which allows patients to request a doctor to visit them at home.

**Hy-genie** – To reduce healthcare associated infections by helping all healthcare workers to improve their hand hygiene performance, by providing personalised, objective feedback irrespective of position or seniority. Wall mounted sensors located next to all gel dispensers which detect when they are used, recording the time, date and person's identity via a sensor in their staff badge holder - providing personal feedback and improvement targets.

**JAMMToday** – Our vision is a world where everyone can access the most innovative financial products to secure a better future for themselves and their families. Comparison service to help people find the right place to put their savings (within the robo-adviser spectrum).

**Nerd Box** – The go-to solution for all tech problems for businesses. An uber style service, connecting businesses with tech with local 'techsperts' to help solve installation and repair issues.

**Playback** – Make experiences unforgettable. By providing access to cutting-edge cameras and editing technology, we will create a large community of authentic content creators. We will provide access to the appropriate equipment for users to make, download and share meaningful video content. Partner with venues and supply cameras and equipment for the venue to then rent to their customers. Once content has been filmed, venues will upload this to our web platform. Then users can easily edit, download and share their videos that have been captured.

**Senti (formerly Chest Sentinel)** – To improve the diagnosis, treatment and ongoing care of patients with breathing issues through continuous, objective, reliable auscultation, in hospitals and at home. A wearable device with inbuilt sensors, to continuously detect breath sounds, which is automatically interpreted using machine learning, and then presented to the clinician or patient.

**Thrift** – Helping people gain financial freedom, so they can have more memorable experiences in life. Our mission is to build a tool that removes the barriers to reselling, building connection and adding hustle to people's lives. By providing a tool that makes reselling online easier.

**Welbee** – Transforming workplace cultures. Wellness programme consisting of an anonymous questionnaire for school staff followed by leadership & wellbeing training and guidance from founder.

**WooWi** – "Supporting individuals by merging mindfulness and technology (focusing on ASD children, then ADHD, ADD, Anxiety)". Detect the onset of emotional stress in children with ASD, (ADHD, ADD and anxiety in the future), then nudge the user to do mindfulness techniques to avoid meltdown or panic attack.
